Sequence 130, Application US/10525817

Publication No. US20060099592A1

GENERAL INFORMATION:
APPLICANT: Nuevolution A/S

TITLE OF INVENTION: Enzymatic encoding
FILE REFERENCE: P912PC00

CURRENT APPLICATION NUMBER: US/10/525,817

CURRENT FILING DATE: 2005-02-25

NUMBER OF SEQ ID NOS: 165

SOFTWARE: PatentIn version 3.1

SEQ ID NO 130

LENGTH: 7

TYPE: PRT
ORGANISM: Artificial Sequence
FEATURE:
OTHER INFORMATION: Artificially produced

| Sequence 35442, Application US/09641528B
| Patent NO. 7026443|
| GENERAL INFORMATION:
| APPLICANT: Sette, Alessandro
| APPLICANT: Sette, Alessandro
| APPLICANT: Southwood, Scott
| APPLICANT: Chesnut, Robert
| APPLICANT: Chesnut, Robert
| APPLICANT: Celis, Esteban
| APPLICANT: Grey, Howard
| TITLE OF INVENTION: INDUCING CELLULAR INMUNE RESPONSES TO HUMAN PAPILLOMAVIRUS
| TITLE OF INVENTION: USING PEPTIDE AND NUCLEIC ACID COMPOSITIONS
| FILE REFERENCE: 2060.0100001
| CURRENT APPLICATION NUMBER: US/09/641,528B
| CURRENT APPLICATION NUMBER: US/09/641,528B
| CURRENT FILING DATE: 2000-08-15
| PRIOR APPLICATION NUMBER: US 60/172,705
| PRIOR FILING DATE: 1999-11-10
| NUMBER OF SEQ ID NOS: 51505
| SOFTMARE: FastSEQ for Windows Version 4.0
| LENGIN ON 35442
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Ş

C; Comment: This peptide was isolated from head extracts. It stimulates muscle contractic C; Superfamily: gastrin
C; Keywords: amidated carboxyl end; neuropeptide; pyroglutamic acid; sulfoprotein
F; 1/Modified site: pyrrolidone carboxylic acid (cln) #status experimental
F; 5/Binding site: sulfate (Tyr) (covalent) #status experimental
F; 10/Modified site: amidated carboxyl end (Phe) #status experimental
